

a

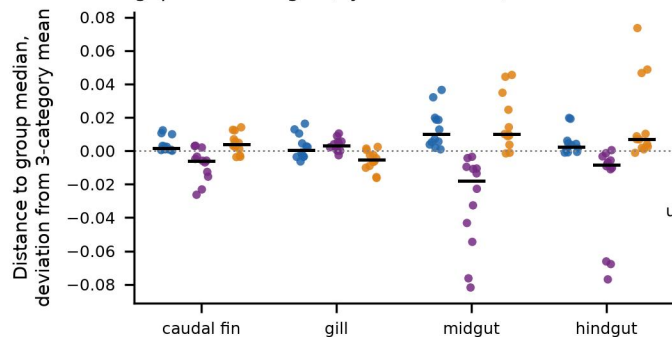

Pass 1 (20 intermediate hybrids): hybrid median lowest in three tissues, highest in the gill; all medians within ± 0.01

**c**

Hybrids are the most dispersed category no more often than chance (binomial $p \geq 0.19$)

**b**

Pass 2 (all 42 hybrids): same ordering; largest gap in the midgut (hybrids -0.018)

**d**

Caudal fin: only weighted UniFrac shows a consistent location effect (pass 1); dispersion differs in 1 run of 3

	pass 1		pass 2	
Bray-Curtis	0	0	0	0
Jaccard	0	0	0	0
unweighted UniFrac	0	0	1	0
weighted UniFrac	3	1	0	0
